

Calculations (tank volume vs. level):	
Total tank capacity (gallons) =	36,967
Enter water level in inches:	50
Volume in single tank (gallons) =	11,848
Volume in all tanks =	23,697
Proportion of full tank capacity remaining =	64%
Supply will last (days) =	237
Until (approximately)	February 11, 2012
Inches of rain needed to fill tank(s) =	3.80
